DETAILED ACTION

Obviousness Type Double Patent

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1 and 3-7 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-24 and paragraphs 44-56 of copending Application No. US. Pub. 2004/0129302. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented. The applicant in this application refers to a "system for processing a workpiece within a plurality of workpiece processors" design in identical terms as the "system for processing a workpiece within a plurality of workpiece processors" design in the cited publication; therefore it is obvious that this change or similar changes do not provide significant patentable distinction between the two applications.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 27 is rejected under 35 U.S.C. 102(b) as being anticipated by Inoue et al. (US Pat. 5,613,343).

In view of claim 27, Inoue et al. teaches a system of workpiece processors (Fig. 3 #13), with at least one of the workpiece processors comprising, a first rotor (#90), a second rotor (#18) with engagement means (#94) for engaging the first rotor to the second rotor, without the need for physical contact between the first rotor and second rotor and loading means for loading a workpiece into and out of a processors (#96).

Allowable Subject Matter

Claims 2, 8-14 and 28-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 15-26 and 30-44 are allowed.
